Eugene Leonov, Ph.D.

Assoc. Dir, Product Technical Lead at MSD
Prague, Czechia

Summary

Senior Software Engineer and Product Tech Lead with 25+ years' experience delivering solutions in healthcare, public health, and pharma

Experience

MSD Czech Republic
10 years 8 months

Assoc. Dir, Product Technical Lead
January 2025 - Present (1 year 7 months)
Prague, Czechia

Leading a team of engineers and scientists to support, develop, and integrate applications for Merck Research Laboratories.

Senior Scientific Software Engineer
December 2015 - January 2025 (9 years 2 months)
Prague, Czechia

Building and supporting scientific applications for Merck Research Laboratories.

Cardio Control Ltd
Co-Founder & Chief Technology Officer (CTO)
January 2012 - November 2015 (3 years 11 months)
Moscow

I co-founded an innovative company focused on home ECG devices and clinical-grade ECG signal processing. We integrated results into a holistic health model delivered via a web application, combining instrumental and laboratory data (e.g., blood pressure, full blood count) to predict risk factors and support general practitioners. I led both hardware and software streams—coordinating hardware engineers and developing the web application and backend services. The company has since joined Nordawind and now sells these devices worldwide.

Black & Veatch

Senior Software Developer

August 2009 - November 2015 (6 years 4 months)

Moscow, Russian Federation

I primarily develop the Electronic Integrated Disease Surveillance System (EIDSS), a multi-module platform for infectious disease surveillance across human, veterinary, and vector domains, with robust analytics and reporting. EIDSS is deployed in Georgia, Azerbaijan, Kazakhstan, and Iraq. I contribute to core modules (Human, Veterinary, Vector Surveillance), Flexible Forms, Custom Reports, Automated Updates, and the Android and web applications used by epidemiologists.

MEDSI

Senior Software Developer

March 2008 - July 2009 (1 year 5 months)

Moscow

I served as a system architect and senior software developer on MEDSI's Medical Information System, helping design and build a full-scale platform that included scheduling, electronic patient records, ambulance workflows, imaging, document storage, and more.

JSC SITRONICS

Software Developer

March 2007 - March 2008 (1 year 1 month)

Moscow, Russian Federation

I worked on the MGTS project, a large-scale fixed telecommunications initiative in Moscow, serving over 15 million users and spanning both hardware and software components.

National Research Center for Information Technology for Extreme Problems (Ministry of Health)

Team Lead

March 2003 - March 2007 (4 years 1 month)

Moscow, Russian Federation

I contributed to two national-scale initiatives: an Electronic System for Infectious Disease Monitoring and Sanitary-Epidemiological Supervision, and a Universal Monitoring System for the storage, transportation, and destruction of chemical weapons. Starting as a researcher/junior developer and progressing to team lead within three years, I handled application development, task decomposition, planning, and team supervision. The infectious disease system is deployed across 174 centers in the Russian Federation, while the chemical weapons health/environment monitoring system has operated

continuously since 2005 and now contains over 2.5 million cases. I also supported implementation at Object #1203 in Kambarka, Udmurtia.

Art Access

Software Developer

July 2002 - November 2002 (5 months)

Moscow

Intern and Junior Software Developer

Education

National University of Science and Technology "MISIS" (Moscow
Institute of Steel and Alloys)

Ph.D. at Cognitive Science, Master at Microelectronics, Cognitive Science,
Microelectronics · (1999 - 2009)
